

## AZTECH COMPONENTS LIMITED

Thank you for visiting our website.

The Company is operated on a daily basis by me, Chris (topher) : Ricketts. I am a graduate engineer, and have some 30 years experience in the compressed air business. I cannot promise you that we will always have the answer : I can promise you that we will always respond positively, and point you in the right direction.

Our priority is always to work with you to help you solve your immediate problem. We understand how important it is to work to find a solution, and quickly.

We are here to give you a deeper level of service and help you solve your problem as quickly and efficiently as we can. That does not mean that we will be “more expensive”. On the contrary, we are very competitive in most areas, because we have some of the UK’s leading manufacturers and suppliers working for, and supporting us.

Our aim is to build a working relationship with you, and provide you with quality products, free advice and practical help, that will be beneficial to your business.

We trust that you will find what you are looking for. If you do not see it straight away, simply ask me (mobile, or email); we will do our level best to help you

The working tag line of our company is **Search/ Source/ Supply**. That describes exactly what we do

Over the past 10 years we have built a good reputation for supplying a broad range of common products. We have also become good at sourcing those hard to find items too.

If you know precisely what you need, then please give us the opportunity to provide you with a competitive offer.

Stock items can usually be despatched the same day. Non-stock items are usually available for next day despatch.

If you are not sure exactly what you need, then that is where our experience could be useful to you.. We are well aware that product labels often disappear, and it can be difficult to identify the manufacturer of the component, let alone the part number.

This is where we can work with you to solve the problem. Work with us. Give us as much information as you can, and we will work to identify what is needed to solve the problem. Send us your best description; email us some pictures; tell us the make and model of the machine to which the item is originally fitted. Leave the rest to us. We will do the legwork. We will dig and search.....

Please put our email address in to your address book. Put my personal telephone number in to your mobile.

Email address: [sales@aztech.uk.net](mailto:sales@aztech.uk.net) My mobile is : 07 905 819 452.

If you would like the experience of Aztech Components Limited to be working for you, just call. We will do the rest.

Thank you.

*Chris : Ricketts*
