SJ-F33-3224	2" x 1.1/2"	60 mm	£21.14

The LET-LOK® range of connectors has been developed to fill the rapidly increasing demand for tube fittings suitable for high pressure use in environments such as petrochemical, fluidpower, nuclear, electronic, as well as other major industries.

LET-LOK® tube fittings have been carefully manufactured and tested to withstand the demands of high performance tube fittings, such as high pressure, impulse, vibration, vacuum and temperature. These tube fittings are manufactured to exacting tolerances using the most modern and advanced computerised automation.

LET-LOK® tube fittings are composed of four parts: 1) body, 2) front ferrule, 3) back ferrule, and 4) nut.

LET-LOK® fittings come assembled. For use insert the tube into the fitting through the back of the nut until the tubing bottoms out on the tube stop of the fitting body, then rotate the nut one and one quarter turns from finger tight. During this rotation of the nut, the front ferrule will move along the tubing. The increased pressure of this movement of the front ferrule causes the nose of the back ferrule to grip the tubing. As the back ferrule grips the tubing it fits the tubing it lifts the front ferrule out to form a line to line fit, or full faced seal, of the front ferrule and the fitting body. This full faced seal is accompanied by a seal at the tubing and the I.D. of the nose of the front ferrule. At the completion of one and one quarter turns of the nut, the front ferrule is sealing the media in and the back ferrule is holding the tube in place.

Material: All components are made from the same material.

Suitable Tubing Materials: Stainless Steel - seamless, fully annealed and welded redrawn, suitable for bending.

Maximum Hardness - Rockwell B90.

ASTM A 269

ASTM A 213

Types: 304 and 316.

Tightening of only 3/4 turn is sufficient for sizes from 1/16th to 3/16th of an inch and those between 2-4 mm.

LET-LOK® IS ALSO AVAILABLE IN IMPERIAL SIZES AND IN A RANGE OF MATERIALS INCLUDING BRASS, MONEL & HASTELLOY C - FOR FURTHER INFORMATION PLEASE CONTACT YOUR DISTRIBUTOR

ASSEMBLY INSTRUCTIONS

- 1) Insert the tubing nesting it in the bottom of the body counterbore.
- 2) Make a mark at the "0" position and be sure the nut is finger tight. Now, simply tighten the nut 1-1/4 turns.

REASSEMBLY INSTRUCTIONS

LET-LOK® fittings may be assembled and disassembled repeatedly. The following instructions should be carried out to reassemble a fitting.

- 1) Insert the tubing end with the previously set ferrules into the fitting body and tighten the nut to a handtight condition.
- 2) With a wrench, tighten the nut until a sharp rise in torque is felt, then simply snug with wrench.

TUBING DATA CHART - STAINLESS STEEL

WALL THICKNESS OF TUBE IN INCH

304 or 316 stainless steel tubing meeting ASTM A-213, 269 or 249 specifications or equivalent. Maximum allowable working pressure in PSI for temperatures between -325°F and 100°F. Allowable stress -18,750 PSI. Calculated burst pressures are four times maximum allowable working pressures.
